

Bronze Medical Centre

Your Health Caring Partner

Meet the Team

Sam and Julian Sanya founded the Bronze Medical Centre with one goal in mind, giving their best to make a better world than they found. Bronze Medical Centre opened its doors in early 2016 and instantly became a community success. We strive each day to bring the best possible healthcare to all of our patients.

The decision to provide the women of Uganda with free healthcare comes from our passion and love for women of our community. Antenatal care is very vital to help a child in development, but is also key in helping women in delivery. 435 women out of 100,000 die in process of child birth in Uganda. This means 16 women die giving birth a day. Most of these deaths are attributed to lack of antenatal care. At Bronze Medical Centre we believe no woman should deliver without a midwife.

We have worked very hard staffing the center with quality nurses and midwives. Our Midwife Isaac is passionate about the healthcare industry because he feels that is the best way for him to serve his country. After receiving his Nursing certificate, Isaac advanced and obtained a diploma in comprehensive nursing, including midwifery.

Jane's journey to midwifery came from her love of God and the love of women. She feels that serving women is her calling. Jane has practiced as an enrolled midwife for one year.
